Summary of Policy on the Use of SI Units 2

Editorial • *Pierre J. Carreau* 3

Articles

Evaluation of a Novel Self-Aerating, Oscillating Baffle Column • *M. R. Mackley, P. Stonestreet, N. C. Thurston and J. S. Wiseman* 5

Pipeline Scale-up in Drag Reducing Turbulent Flow • *Arun Sood and Edward Rhodes* 11

Axial and Lateral Dispersion of Fine Particles in a Binary-Solid Riser • *Fei Wei, Yi Cheng, Yong Jin and Zhiqing Yu* 19

Numerical Flow Simulation of Viscoplastic Fluids in Annuli • *Oliver F. J. Meuric, Tak W. Chiu, Richard J. Wakeman and Kenneth A. Fisher* 27

Électrodes Poreuses Percolées Constituées de Métal Fritté: Hydrodynmique et Transfert de Matiére • *Eudésio Oliveira Vilar et François Coeuret* 41

Comments on Modelling the Diffusion-Controlled Adsorption of Surfactants • *John R. Campanelli and Xiaohong Wang* 51

Kinetic Models for Non-Homogeneous Complex Systems with a Time-Dependent Rate Constant • *Daniel Montané, Ralph P. Overend and Esteban Chornet* 58

Representation of the Concentric Spherical Powder Reation Model in the Form of Linear Regression Analysis • *Akira Shimizu, Yu-Jun Hao and Tatsuo Tanaka* 69

Oxidation of Low Concentrations of Hydrogen Sulfide: Process Optimization and Kinetic Studies • *Aimin Yang, Eric L. Tollefson and Ajay K. Dalai* 76

Cold Enzyme Hydrolysis of Wheat Starch Granules • *Steven D. Textor, Gordon A. Hill, Douglas G. MacDonald and Earl St. Denis* 87

Modeling Infinite Dilution Activity Coefficients of Organic-Aqueous Systems Using a Modified Regular Solution Equation and Cubic Equations-of-state • *Mansour S. H. Bader and Khalid A. M. Gasem* 94

Theoretical and Experimental Investigations of Molecular Migration and Diffusion Kinetics of Organic Esters into Tetrafluoroethylene/Propylene Copolymer Membranes • *Tejraj M. Aminabhavi, Sujata F. Harlapur, Ramachandra H. Balundgi and J. Dale Ortego* 104

Numerical Analysis on Optimal Zone Lengths for Each Pass in Multipass Zone-Refining Processes • *Chii-Dong Ho, Ho-Ming Yeh and Tzuoo-Lun Yeh* 113

Viscoplastic Flows in Ducts • *Thong Van Pham and Evan Mitsoulis* 120

A New Correlation for Characteristic Velocity in Rotating Disc Contactors • *Ponnusamy Kalaichelvi and Thanapalan Murugesan* 126

Minimum Spouting Velocity for Binary Mixture of Particles in Rectangular Spouted Beds • *M. Z. Anabtawi* 132

Rising Velocity of a Swarm of Spherical Bubbles in Power Law Fluids at High Reynolds Numbers • *R. P. Chabra* 137

Contents Page from Chemical Engineering Research and Design, February 1998 140

Transient Heat Transfer in a Fixed Bed of Slab-Shaped and Spherical Particles with Intraparticle Conduction • *Roya Sheikholeslami and A. Paul Watkinson* 141

A New Method for Predicting Viscosity of Pure Organic Liquids • *Hilal Gürbüz Yücel and Sibel Özdogan* 148

A Soft Sensor for Flotation Plants • *Claude Basin and Andrew Trusiak* 156

Instructions of Authors ..... I.B.C.

April 1998

Articles

A Three Dimensional Model for Simulating the Maldistribution of Liquid Flow in Random Packed Beds • *M. Song, F. H. Yin, K. Nandakumar and K. T. Chuang* 161

The Marangoni Effect and Enhanced Oil Recovery Part 1. Porous Media Studies • *Paul A. Lyford, H. R. C. Pratt, Franz Grieser and David C. Shallcross* 167

The Marangoni Effect and Enhanced Oil Recovery Part 2. Interfacial Tension and Drop Instability • *Paul A. Lyford, David C. Shallcross, Frann Grieser and H. R. C. Pratt* 175

A Stochastic Model for the Simulation of the Natural Flow in Random Packed Columns • *M. Song, F. H. Yin, K. T. Chuang and K. Nandakumar* 183

Investigation of the Mean and Turbulent Particle Velocity Fields in a Spouted Bed Using Radioactive Particle Tracking • *Toufik Djeridane, Faiçal Larachi, David Roy, Jamal Chaouki and Robert Legros* 190

Autofluidization: The Fluidization of Solid Particles by Gases Evolving from the Particles • *A. David Lawrence, Peter E. Gogolek and James Kuang* 196

Etude Numérique de l'Influence de l'Inclinaison sur l'Evaporation d'un Film Liquide s'Écoulant sur une Paroi Plane Isotherme ou à Flux de Chaleur Imposé • *El Hacene Mezaache et Michel Daguenet* 203

Nonlinear Instabilities of Falling Films on a Heated Vertical Plane with Gas Absorption • *Subodhsen Peramanu and Ashutosh Sharma* 211

Gas-Solid Mass Transfer in a Rotating Drum • *Ritika Jauhari, Murray R. Gray and Jacob H. Masliyah* 224

The Dissolution Kinetics of Sand as Function of Particle Size • *Ferida Jendoubi, Arbi Mgaidi and Mohamed El Maaoui* 233

Dynamics of the Fisher-Tropsch Synthesis Over a Supported Cobalt Catalyst • *Abbas A. Khodadadi, Robert R. Hudgins and Peter L. Silveston* 239

The Effect of Chloride on the $HClO_2$-$HOCl_2$ Reaction in a 4.5 mol/L Sulfuric Acid Solution • *G. Yin and Y. Ni* .. 248

Ethanol-Water Pulping: Cooking Variables Optimization • *M. A. Gilarranz, M. Oliet, F. Rodriguez and J. Tijero* .. 253

Enhancement of the Retention Perfomance of the Poly (ethylene oxide) - Tannic Acid System by Poly(diallyl-dimethyl ammonium chloride) • *KH. KH. Khoultchaev, P. Pang, R. J. Kerekes and P. Englezos* 261

Metabolic Responses of Plant Cell Culture to Hydrodynamic Stess • *Toskiya Takeda, Takanori Kitagawa, Yoshikuni Takeuchi, Minoru Seki and Shintaro Furusaki* 267

Optimisation de l'hydrolyse des Protéines du Lactosérum en Utilisant des Détergents Commerciaux Enzymatiques et non-Enzymatiques • *M. Ángeles Argüello, Dominique Elzo, Francisco A. Riera et Ricardo Álvarez* 276

Use of Velocity of Sound in Predicting Thermodynamic Properties of Dense Fluids from Cubic Equations of State • *Mohammad R. Shabani, Mohammad R. Riazi and Habib I. Shaban* 281

Derivation of a Control Oriented Low Order Model of the Dynamics of an Infrared Oven for the Continuous Drying of a Thin Sheet of Material • *Ramdhane Dhib, Normand Thérien and Arthur Douglas Broadbent* 290

Ordonnancement à Court-Terme d'un Atelier Discontinu de Chimie Fine • *Philippe Baudet, Catherine Azzaro-Pantel, Serge Domenech et Luc Pibouleau* 300

Notes

Local Bubble Behavior in Three-Phase Fluidized Beds • *Z. Chen, C. Zheng, Y. Feng and H. Hofmann* 315

A Generalized Back-Flow Model to Predict the Tracer Response in Liquid–Liquid Stagewise Contactors • *Parichay K. Das* 319

Contents Page from Chemical Engineering Research and Design, March 1998 322

A Study of Mass Transfer Behavior in a Catalytic Distillation Column • *Chuncheng Huang, Gary G. Podrebarac, Flora T. T. Ng, and Garry L. Rempel* 323
Increase in the Thermal Stability During the Methanation of CO_2 Over a Rh Catalyst Prepared from an Amorphous Alloy • *T. Kai, Y. Yamasaki, T. Takahashi, T. Masumoto and H. Kimura* 331
Contents Page from Chemical Engineering Research and Design, May 1998 335

Résumé de la politique concernant les unités SI 336

Instructions to Authors ..... I.B.C.

June 1998

Engineering Research on Mixing: State of the Art

Introduction and Overview • *Philippe A. Tanguy and Alvin W. Nienow* 337
Design of Stirred Vessels with Gas Entrained from Free Liquid Surface • *Ashwin W. Patwardhan and Jyeshtharaj B. Joshi* 339
Interstage Backmixing of an Aerated Multistage, Mechanically-Agitated, Compartmented Column • *Mohd Sobri Takriff, W. Roy Penney and Julian B. Fasano* 365
Axial Mixing in a 15 cm Diameter Reciprocating Plate Bubble Column • *Malcolm H. I. Baird and Nadella V. Rama Rao* 370
Power Consumption and Mass Transfer in Agitated Gas–Liquid Columns: A Comparative Study • *Hélène Gagnon, Mustapha Lounès and Jules Thibault* 379
Bubble Size and Mass Transfer Coefficients in Dual-Impeller Agitated Reactors • *Mounir Bouaifi and Michel Roustan* 390
Scale-up of Mixing in Gassed Multi-Turbine Agitated Vessels *Jorge M. T. Vasconcelos, Sebastião S. Alves, Alvin W. Nienow and Waldemar Bujalski* 398
Non-Uniformity of Gas Dispersion in Turbine-Generated Viscoelastic Circulation Flow • *Serafim D. Vlaev and Martin Martinov* 405
Determination of Correlations to Predict the Agitation Speed for Complete Solid Suspension in Agitated Vessels • *Piero M. Armenante, Ernesto Uehara Nagamine and Jessyca Susanto* 413
Unsuspended Mass of Solid Particles in Stirred Tanks • *Alberto Brucato and Valerio Brucato* 420
Agitation Power for Solid–Liquid Suspensions Containing Large Particles • *Roberto Bubbico, Sergio Di Cave and Barbara Mazzarotta* 428
Solids Suspension with Up-Pumping Pitched-Blade and High-Efficiency Impellers • *Kevin J. Myers and André Bakker* 433
Solid–Liquid Mass Transfer in a Shaking Vessel for a Bioreactor with "Current Pole" • *Yoshihito Kato, Setsuro Hiraoka, Yutaka Tada and Toshio Nomura* ... 441
Solid–Liquid Mass Transfer Coefficients in Gas–Solid Liquid Agitated Vessels • *Franco Grisafi, Alberto Brucato and Lucio Rizzuti* 446
Drop Break-up in Intermittent Turbulence: Maximum Stable and Transient Sizes of Drops • *Jerzy Baldyga and Wioletta Podgórska* 456
Newtonian Power Curve and Drop Size Distributions for Vibromixers • *Mei Y. A. Lo, Andrej T. Gierczyckil, Nigel J. Titchener-Hooker and Parviz Ayazi Shamlou* 471
Evolution of the Microstructure and Rheology of O/W Emulsions During the Emulsification Process • *M. Carmen Sánchez, Manuel Berjano, Antonio Guerrero, Edmundo Brito, Crispulo Gallegos* 479
Phase Inversion Studies in Liquid–Liquid Dispersions • *Michael A. Norato, Costas Tsouris and Lawrence L. Tavlarides* 486
Calculation of the Particle Size Distribution in Suspension Polymerization using a Compartment-Mixing Model • *Eduardo Vivaldo-Lima, Philip E. Wood, Archie E. Hamielec and Alexander Penlidis* 495
In Situ Rheological Monitoring in Semi-batch Emulsification Process for Cosmetic Lotion Production • *Lionel Choplin, Sandrine Torandell and Jacques Servoin* 506
Demixing Effects in Laminar Shearing Flows: A Practically Useful Approach • *Sushant Agarwal, Deepak Doraiswamy and Rakesh K. Gupta* 511
Quantification of Laminar Mixing in the Kenics Static Mixer: An Experimental Study • *Shaffiq A. Jaffer and Philip E. Wood* 516
Determination of the Mixing Performance of Sulzer SMV Static Mixers by Laser Induced Fluorescence • *Asma Karoui, Frédéric Hakenholz, Nathalie Le Sauze, Jean Costes and Joël Bertrand* 522
Numerical Investigation of the Performance of Several Static Mixers • *Damien Rauline, Phillipe A. Tanguy, Jean-Marc Le Blévec and Jacques Bousquet* 527
Averaged and Time-Resolved, Full-Field (Three-Dimensional), Measurments of Unsteady Opposed Jets • *Yang Zhao and Robert S. Brodkey* 536
Experimental and Numerical Characterization of Viscous Flow and Mixing in an Impinging Jet Contactor • *David R. Unger, Fernando J. Muzzio and Robert S. Brodkey* 546
Effect of Blade Pitch on the Structure of the Trailing Vortex around Rushton Turbine Impellers • *Wei-Ming Lu and Bing-Shiou Yang* 556
Turbulence in Stirred Tanks: Anisotropic, Approximate, and Applied • *Suzanne Kresta* 563
A Study of an Up- and a Down-Pumping Wide Blade Hydrofoil Impeller: Part I. LDA Measurements • *Ved P. Mishra, Kate N. Dyster, Zdzislaw Jaworski, Alvin W. Nienow and Jack McKemmie* 577
Pumping, Spraying, and Mixing of Fluids by Electric Fields • *Costas Tsouris, Won-Tae Shin and Sotira Yiacoumi* 589
Characterization of Stirred Vessel Hydrodynamics by Three Dimensional Trajectography • *Stephan Wittmer, Laurent Falk, Pascal Pitiot and Hervé Vivier* 600
Validation of CFD Simulations of a Stirred Tank Using Particle Image Velocimetry Data • *Jian Sheng, Hui Meng and Rodney O. Fox* 611
Measurement of the Local Intensities of Segregation with the Tomographical Dual Wavelength Photometry • *Mathias Buchmann and Dieter Mewes* 626
Direct Prediction of the Flows Induced by a Propeller in an Agitated Vessel Using an Unstructured Mesh • *Isabelle Naude, Catherine Xuereb and Joël Bertrand* ... 631
Non-isothermal Micromixing in Turbulent Liquids: Theory and Experiment • *Jerzy Baldyga, John R. Bourne and Benedikt Walker* 641
Effect of Micro-Mixing on the Yield of Intermediates in Triplet Consecutive/Competitive Reactions • *Amer M. El-Hamouz and Reginald Mann* 650
Experimental Measurements and Simulation of Mixing and Chemical Reaction in a Stirred Tank • *Robert P. Zipp and Gary K. Patterson* 657
The Use of Mixing-Sensitive Chemical Reactions to Study Mixing in Dispersed Fibre Systems: Adsorption of Reactants and Product Dyes on the Dispersed Phase • *Joseph P. Mmbaga and Chad P.J. Bennington* 670

Regular Article

Gas Chromatography - Mass Spectrometric Determination of Unsymdimethylhydrazine in Soil and Water by Derivatization with Aromatic Aldehydes • *Shamil Cathum, Vladimir Atamaniouk, Lioudmila Ananieva, Caroline Ladanowski and Harry Whitaker* 680

Letter to the Editor 686

Summary of Policy on the Use of SI Units 688

Instructions to Authors ..... I.B.C.

August 1998

Articles

Process Viscometry of Complex Fluids and Suspensions with Helical Ribbon Agitators • *Edmundo Brito-De La Fuente, Jose A. Nava, Luz Maria Lopez, Luis Medina, Gabriel Ascanio and Philippe A. Tanguy* 689

Hydrodynamics of Pressurized Spouted Beds • *Yan-Long He, Choon J. Lim and John R. Grace* 696

Spout Diameters in Full and Half Spouted Beds • *Yan-Long He, Choon J. Lim, Shao-Zhong Qin and John R. Grace* 702

Mixing Study in an Inductive Plasma Reactor: Comparison Between Model Calculations and Experimental Results • *Martin Désilets, Benoît Davies, Gervais Soucy and Pierre Proulx* 707

Natural Convection in a Porous Medium at High Rayleigh Numbers — Application of Prandtl's Analogy • *Vedula Dharma Rao, Sureddy V. Naidu and Pullela K. Sarma* 717

Theoretical Investigation Into Instability of a Refrigeration System with an Evaporator Controlled by a Thermostatic Expansion Valve • *Ghaleb A. Ibrahim* 722

Numerical Prediction of Wall Mass Transfer Rates in Turbulent Flow Through a 90° Two-Dimensional Bend • *Donald J. Bergstrom, Trevor Bender, George Adamopoulos and John Postlethwaite* 728

RTD Studies in Trickle Bed Reactors Packed with Porous Particles • *Anil K. Saroha, K. D. P. Nigam, Alok K. Saxena and Lalji Dixit* 738

Characterization of Dispersed Hydroprocessing Catalysts Prepared in Reversed Micelles • *Andrew G. Hall, Apinya Duangchan and Kevin J. Smith* 744

Selective Kinetic Deactivation Model for Methanol Synthesis from Simultaneous Reaction of CO_2 and CO with H_2 on a Commercial Copper/Zinc Oxide Catalyst • *Mohammad Reza Rahimpour, Jamshid Fathikalajahi and Abdolhosein Jahanmiri* 753

A Method of Evaluating Limestone Reactivity with SO_2 under Fluidized Bed Combustion Conditions • *Tobias Mattisson and Anders Lyngfelt* 762

Kinetics and Extraction of Phenol in Phase-Transfer Catalyzed Reaction • *Ho-Shing Wu and Chien-Bang Liu* 771

Kinetics of Fructose-Glucose Isomerization with Sweetzyme Type A • *V. Bravo, E. Jurado, G. Luzón and N. Cruz* 778

Stresses on Immobilized *Phanerochaete Chrysosporium* Hyphae in Submerged Cultures for Ligninase Production • *Zhonming Zhen and Jian Yu* 784

Faradaic Processes on Activated Carbon Particles: Example of Sulfite Anodic Oxidation • *Torsten Balduf, Gérard Valentin and François Lapicque* 790

Evaluation des Dépôts d'Aérosols par Thermo et Diffusiophorèse lors de l'Ecoulement dans une Conduite Cylindrique — Applications aux Essais Tuba Diffusiophorèse • *André Zoulalian et Thierry Albiol* .. 799

Batch Reactor Control Using a Multiple Model-Based Controller Design • *Arun Krishnan and Karlene A. Kosanovich* 806

Contents Page from Chemical Engineering Research and Design, July 1998 815

Notes

Viscous and Yield Stress Properties of Athabasca Topped Heavy Oil • *Daniel De Kee, Esteban Chornet and Wenqi Zhang* 816

Contents Page from Chemical Engineering Research and Design, September 1998 821

The Kinetics of Sorption of Basic Dyes from Aqueous Solution by Sphagnum Moss Peat • *Y. S. Ho and G. McKay* 822

Erratum 827

Liquid-Liquid Equilibria of Ternary ETBE-EtOH-H_2O and Quanternary ETBE-EtOH-H_2O-TBA Mixtures • *A. T. Quitain and S. Goto* 828

Summary of Policy on the Use of SI Units 832

Instructions to Authors ..... I.B.C.

October 1998

Review

Oxidation of Hydrocarbons by Hydrogen Peroxide over Ti Catalysts: Kinetics and Mechanistic Studies • *Jean Émile Gallot and Serge Kaliaguine* 833

Articles

Predictions on Bubble and Solids Movement in Laboratory Polyethylene Fluid Beds as Visualized by X-ray Computer Assisted Tomography (CAT) Scanning • *Taghi Zarabi and Apostolos Kantzas* 853

A Study of an Up- and a Down-Pumping Wide-Blade Hydrofoil Impeller: Part II. CFD Analysis • *Zdzislaw Jaworski, Miroslaw L. Wyszynski, Kate N. Dyster, Ved P. Mishra and Alvin W. Nienow* 866

Enhancement of Mass Transfer in Flow Channels under Thermal Gradients • *Guido Bendrich and Leslie W. Shemilt* 877

Estimation of Surface Diffusion Coefficient in Liquid Phase Adsoption • *Kanji Miyabe and Shigeya Takeuchi* .. 887

Mass Transfer from Spherical Particles and Reservoirs into Quiescent Liquids • *Huu D. Doan, Olev Trass and Muhammad E. Fayed* 893

Kinetics and Reaction Mechanism of Catalytic Oxidation of Low Concentrations of Hydrogen Sulfide in Natural Gas Over Activated Carbon • *Ajay K. Dalai and Eric L. Tollefson* 902

Sodium Aluminosilicate Crystal Formation in Alkaline Solutions Relevant to Closed Cycle Kraft Pulp Mills • *Hyeon Park and Peter Englezos* 915

Quantitative Description of the Chloride Effect on Chlorine Dioxide Generation from the ClO^-_2 - HOCl Reaction • *Guohong Yin and Yonghao Ni* 921

Control of the Product Distribution in the Hydrogenation of Vegetable Oils over Nickel on Silica Catalysts • *M. Pilar González-Marcos, José I. Gutiérrez-Ortiz, Cristina González-Ortiz de Elguea, Jon I. Alvarez and Juan R. González-Velasco* 927

Ozonation and Photodegradation Kinetics of Pollutant Acids in Wastewaters • *F. Javier Benitez, Jesus Beltran-Heredia, Teresa Gonzalez and Francisco Real* 936

The Solubility of Methane in Aqueous Solutions of Mono-ethanolamine, Diethanolamine and Triethanolamine • *John J. Carroll, Fang-Yuan Jou, Alan E. Mather and Frederick D. Otto* 945

Modelling the Boiling Delay Upon Venting Vapour from a Saturated Liquid-Vapour System • *D.S. Lubbe and Gerrit Kornelius* 952

Notes

Unsteady Mass Transfer Between a Slender Bubble and a Viscous Liquid in a Simple Extensional Flow • *Moshe Favelukis* 959

Solubility of Acid Gases in a Mixed Solvent • *Dhiraj Lal, Frederick D. Otto and Alan E. Mather* 964

Tuning Digital PI Controllers for Minimal Variance in Manipulated Input Moves Applied to Imbalanced Systems with Delay • *Jeffrey Dean Kelly* 967

Contents Page from Chemical Engineering Research and Design, October 1998 974

Résumé de la politique concernant les unités SI 975

Call for Papers 976

Instructions aux auteurs ..... I.B.C.

December 1998

Éditorial

Journées d'électrochimie : applications au génie chimique • *Oumarou Savadogo* 977

Special Articles

Augmentation, par régénération électrochimique du substrat, de la production d'une biomasse (*Thiobacillus ferrooxidans DSM 583*) pour un procéde biologique de récupération de métaux • *Jean-Pierre Magnin, Francis Baillet, Agnès Boyer, Roumen Zlatev, Mariana Luca, Arlette Cheruy et Patrick Ozil* 978

L'electrolyseur dans l'optique de la dynamique des procédés • *Thomas Z. Fahidy* 985

Matériaux anodiques pour électrolyseurs • *Didier Devilliers et Henri Groult* 991

Fabrication of Amperometric Biosensors by Entrapment of Enzymes in Functionalized Polypyrrole Films • *Serge Cosnier* 1000

Propriétés rédox de fullerènes fonctionnalisés • *Corinne Boudon, Jean-Paul Gisselbrecht, Maurice Gross, Francesca Cardullo, Paul Seiler, Lyle Isaacs, Jean-François Nierengarten, Richard F. Haldimann, François Diederich, Tiziana Mordasini-Denti et Walter Thiel* ... 1008

Electrosynthèses de composés carbonylés catalysées par des complexes du nickel : activation du monoxyde de carbone ou de composés acylés • *Michel Troupel, Maiténa Oçafrain, Eric Dolhem, Jean-Claude Folest and Rachid Barhdadi* 1013

Greffage de molécules à la surface du silicium par voie électrochimique • *François Ozanam, Charlotte Vieillard, Marcel Warntjes, Thomas Dubois, Maxime Pauly et Jean-Noël Chazalviel* 1020

Modélisation de la cinétique morphologique en corrosion générale et en corrosion localisée • *Gérard Santarini* ... 1027

Transfert de matière et chute de pression lors d'un écoulement tourbillonnaire annulaire non-entretenu induit par une entrée tangentielle • *Géraldine Lefèbvre, Severino R. Farias Neto, Hacène Aouabed, Patrick Lengentilhomme et Jack Legrand* 1039

Regular Articles

A Numerical Study of the Accelerating Motion of a Dense Rigid Sphere in Non-Newtonian Power Law Fluids • *Rajendra P. Chhabra, Armando A. Soares and Jose M. Ferreira* 1051

Gas-Liquid Mixing Studies with Multiple Up- and Down-Pumping Hydrofoil Impellers: Power Characteristics and Mixing Time • *Danawati Hari-Prajitno, Ved P. Mishra, Katsuhide Takenaka, Waldemar Bujalski, Alvin W. Nienow and Jack McKemmie* 1056

A Mathematical Model for Drum Drying of Black Liquor Slurry using Superheated Steam Impinging Jets • *Amir H. Shiravi, Arun S. Mujumdar and George J. Kubes* 1069

The Kinetics of Carbochlorination of Titania Slag • *Hong Yong Sohn and Ling Zhou* 1078

Parameter Sensitivity of Kinetics-Based Hydrometallurgical Reactor Models • *Susan A. Baldwin and George P. Demopoulos* 1083

Catalytic Steam Pyrolysis of a Selected Saturated Hydrocarbon on Calcined Mineral Particles • *Georgios Taralas* 1093

A Hybrid Expert-Procedural System for the Design of Reverse-Osmosis Desalination Plants • *Dimosthenis Voivontas, Kostas Papafotiou, Dionysis Assimacopoulos and Evan Mitsoulis* 1102

Application of Iterative Dynamic Programming to Optimal Control of a Distillation Column • *Miroslav Fikar, Abderrazak M. Latifi, Frantz Fournier and Yann Creff* 1110

Notes

A Simple Adaptive Control Strategy for Temperature Trajectory Tracking in Batch Processes • *Chyi-Tsong Chen and Shih-Tien Peng* 1118

Dynamic Modelling of Consecutive Reactions: Application to the Acrylonitrile Amination • *Brahim Kadri, Bernard Fabre, Armand Accary and Mathieu Kessler* 1128
